

Annual Scientific Meeting – January 26th – January 30th, 2020 Fairmont Tremblant, Quebec, Canada

Session Learning Objectives:

- Create new knowledge through the dissemination of research involving clinical and epidemiological studies in pediatric emergency medicine.
- Enhance the image of pediatric emergency medicine as a credible academic discipline with its own research agenda.
- Develop cohesiveness between centers involved in the practice of pediatric emergency medicine.

Guest Speaker - Dr. Marc Cherniwchan

- Dr. Cherniwchan is an associate Clinical Professor in the Department of Emergency Medicine in the Faculty of Medicine and Dentistry at the University of Alberta.
- **Presentation Title:** *Ex Nihilo: How Innovation Arises from the Ashes of Burnout*
- **Learning Objectives:** This keynote addresses the issue of how PERC members can envision and develop new ideas within the demanding environments of clinical Emergency Medicine and academic research. Current thought on the nature of the creative process itself will be reviewed - followed by an exploration of inhibitors present in the current workplace. Suggestions will then be provided on ways of facilitating the birth of new ideas by individual researchers, as well as working groups, and the system as a whole. Experience, research, and actual real-life examples will be provided from a wide variety of sources within, and outside of, medicine.
